Summary

Passionate Software Developer with experience in designing and developing scalable full-stack web applications and AI-powered software solutions. Strong foundation in software engineering, modern web technologies, RESTful APIs, and database systems, with hands-on experience leveraging Modern AI tools and technologies to build intelligent, efficient applications that solve real-world problems.

Education

Ani Neerukonda Institute of Technology and Sciences

B.Tech , Electrical and electronics engineering

Expected May 2027

Visakhapatnam , Andhra Pradesh

Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Computer Networks
- Object-Oriented Programming
- Operating Systems
- Software Engineering

Work Experience

Database Intern (MySQL)

May 2025 – July 2025

ExcelR EdTech Pvt. Ltd.

- Gained hands-on experience with relational database concepts including tables, constraints, joins, and normalization.
- Designed and executed 50+ SQL queries for data retrieval, filtering, joins, aggregation, and reporting using MySQL.
- Worked with MySQL to perform CRUD operations and understand real-world database workflows.
- Enhanced understanding of DBMS concepts through hands-on assignments and real-world case studies.

Projects

TripPilot – AI Travel Management Platform | *React.js, Node.js, Express.js, MongoDB, Groq AI, JWT, Tailwind CSS*

- Architected and developed a full-stack AI-powered travel management platform with JWT-based authentication, role-based authorization (User, Premium, Admin), and a scalable modular MERN architecture.
- Integrated Groq AI to generate personalized travel itineraries, power an AI Travel Copilot, optimize trip budgets, and deliver contextual travel recommendations.
- Designed and implemented secure RESTful APIs for trip management, itinerary timelines, expense tracking, notes, AI chat history, and premium feature access with RBAC.
- Utilized MongoDB Atlas for scalable data storage and deployed the application using Vercel and Render with a responsive, modern user interface.

AI Mock Interview Platform | *React.js, Node.js, Express.js, MongoDB, Groq AI, JWT*

- Developed a full-stack AI-powered interview preparation platform with secure JWT-based authentication and a responsive user interface.
- Integrated Groq AI to dynamically generate interview questions and provide AI-based answer evaluation and feedback.
- Designed and implemented RESTful APIs for user management, interview sessions, and interview history tracking.
- Utilized MongoDB for scalable data storage and deployed the application using Vercel and Render.

MERN Notes Website – Secure Note Management Application | *React.js, Node.js, Express.js, MongoDB, JWT*

- Built a secure note management application enabling users to create, update, and delete personal notes.
- Implemented JWT-based authentication and authorization to ensure secure access to user-specific data.
- Developed RESTful CRUD APIs using Node.js and Express.js for seamless note management.
- Designed MongoDB schemas and collections for efficient storage and retrieval of notes.

Skills

Languages: Python, JavaScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook, Vercel

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

Achievements

- Completed **Full-Stack Development Certification** from **Simplilearn** (January 2026).
- Earned **Artificial Intelligence Fundamentals Certification** from **IBM SkillBuild** (December 2025).
